Announcement: Caliber Signs Agreement with UVAIRx

Date: 18 September 2019

Caliber Sales and Consulting has finalized an agreement with UVAIRx, solidifying mutual efforts that have been underway since late 2018.

The agreement between Caliber and UVAIRx is a distributorship agreement benefitting both parties and giving Caliber the right to the sales of UVAIRx products worldwide, as well as the honor to represent UVAIRx into burgeoning markets. Caliber immediately took advantage of the opportunity and forged an agreement between UVAIRx and Ogena Solutions. With Caliber’s support, Ogena is poised to propel sales of UVAIRx into the North American Animal Health market.

Like Caliber, UVAIRx is a Veteran owned/operated company. UVAIRx’s claim to success lies in having taken cutting edge Photocatalytic Oxidation (PCO) technology, first developed by NASA, and improving the design and engineering of its units to have the highest efficacy and coverage against harmful pathogens available on the market today.

Calber is proud to represent UVAIRx in markets where their products have wider applications, specifically for military use in protecting Soldiers, Sailors, Marines, and Airmen from the spread of infectious diseases at home and when deployed.

Caliber is honored to partner with as reputable an organization as UVAIRx and we look forward to many years of future successes!
