Announcement: Donation of *UVAIRx* unit to COL (Ret) Roger Donlon

Date: 6 November 2020

Recently, Caliber Sales had the opportunity to donate a *UVAIRx* Ux105 Lite air cleaner unit to Colonel (Retired) Roger and Mrs Norma Donlon. COL Donlon is a retired US Army Special Forces Officer and the first recipient of the Medal of Honor for the Vietnam War. He is also the first recipient of this award from US Special Operations Forces (SOF).

During his 30-plus years of active service and beyond, COL Roger and Mrs Norma Donlon have been tireless advocates for Soldiers and their families, and active contributors to their community. They were past recipients of the American Century Award from the *Washington Times* for their contributions in representing their home state of Kansas. As well, COL and Mrs Donlon were instrumental in the founding of the Nam Dong Special Forces Library Learning Center. This children’s library was built solely with private donations and honors the sacrifices of US Army Special Forces Soldiers and their Montagnard allies at the Battle of Nam Dong in 1964, for which COL Donlon received the Medal of Honor.

Mrs Norma Donlon is also a Gold Star widow and has been awarded the ‘Heroine of the Infantry’ award from the *National Infantry Association* for her significant contributions to the wellness of Infantry Soldiers and their families. She is also one of only seven women to be inducted as an Honorary Member of the *Special Forces Association*. COL and Mrs Donlon have been married for 52 years this month.

In recognition of their enormous contributions to the security of the United States and the welfare of its Soldiers and their families, Caliber was honored to present the Donlon’s with a Ux105 Lite air cleaner unit. This unit has been emplaced in their residence to protect their health by continuously cleaning the air and surfaces of their home.
